

'Sense'sational Family Nature Camp

This is a 2-day half day camp from 12:30 pm to 4:30 pm. Snack will be provided, but please bring any additional/different snacks as desired or has sensitivities. Activities are subject to change due to weather or other conflicts. On the formal camp letter, which you will receive on the first day of camp, will have which day specific activities will take place.

Brevard Zoo's Education Department is excited to announce a camp that is designed specifically for children with varying exceptionalities and a parent or guardian. 'Sense'sational Family Nature Camp will combine our extensive knowledge of zoo camp and best experiences for a 2-day camp that will be memorable and rewarding for you and your camper with sensory needs! Throughout the 2-day camp we will also explore our outdoor Exceptional Nature Space and educational classrooms as well as take excursions into the Zoo. The focus will promote wildlife appreciation, inclusion and creative expression in every camper!

The design of the program is flexible to meet the needs of individuals within the camp group and allow for individual expression. If campers have communication impairments, they should be accompanied by someone who is able to facilitate communication on their behalf. **In order to register, please contact Lindsay Mathisen at lmathisen@brevardzoo.org to discuss your child's needs and ensure that Zoo Camp is a good match.** We also encourage our campers, aides, and parents to attend our First Look into Zoo Camp and then stay for our open free play in our Exceptional Nature Space on April 7 or May 20.
